- 09/03 - 08/11 *President of Schlumberger Russia, Moscow*
  - Developed and implemented the Schlumberger Russia business strategy, multiplying revenues by 8 in 7 years, and the head-count by 6 to reach 15,000 employees

Organic growth:

- Established infrastructure in all major hydrocarbon basins and new frontiers
- Positioned Schlumberger as a solution provider for national and international companies in Russia
- Implemented research, engineering and manufacturing for high and fit-for-purpose technology facilities, meeting worldwide quality standards:
  - Wireline Logging Tools open & cased hole (3 plants)
  - Complete perforating system: Guns and explosives charges (2 plants)
  - Electrical submersible pumps (2 plants)
- Created worldwide class training center in Tyumen
- Raised Schlumberger's image in Russia as a recognized technology partner - at Russian government authorities and in the oil & gas industry
- Managed to export products made in Russia which compete with US made products (perforating system)

Inorganic growth:

- Led the acquisition in Russian companies, amounting to 25 transactions, to access some key technology or increase operation footprint
